

Taking the Quantum Leap: The New Physics for Nonscientists, 2010, 304 pages, Fred A. Wolf, 0062036394, 9780062036391, HarperCollins, 2010

This book entertainingly traces the history of physics from the observations of the early Greeks through the discoveries of Galileo and Newton to the dazzling theories of such scientists as Planck, Einstein, Bohr, and Bohm. This humanized view of science opens up the mind-stretching visions of how quantum mechanics, God, human thought, and will are related, and provides profound implications for our understanding of the nature of reality and our relationship to the cosmos.
